

DELTA

Your Connection to Powerful Solutions

1-800-272-8350

In Shop or Field Installation & Repairs

Delta Electro Power is your one stop for your electric motor, pump, power transmission and control installation or repair. No matter the industry, Delta Electro Power's solution-based approach saves customers time and money. Our dedicated field service teams have over 400 years of combined experience, providing the technical knowledge and craftsmanship to repair your equipment and decrease downtime. Backed by our 15,000 sq ft machine shop, our field engineers and in-shop mechanics have what they need to keep your processes running.

Delta Electro Power is an owner managed business serving the New England market since 1977. We treat our clients like family, caring for your needs and providing the level of service that we would want to receive ourselves.

Field Services

Delta Electro Power's dedicated and experienced field service engineers provide predictive and preventative maintenance services for electric motors, pumps, power transmissions and controls. Using state-of-the-art diagnostic technologies, our team can troubleshoot your problems quickly and provide maintenance assessments with documented recommendations. Delta Field Services are available on a per-job basis, as managed programs, or integrated with your in-house maintenance operations.

- ◆ Equipment rigging, removal, installation, & startup
- ◆ On- and off-line electrical testing
- ◆ Crane truck services
- ◆ Emergency services and outage support
- ◆ Engineering consulting & root cause failure analysis
- ◆ Balancing & vibration analysis

In-Shop Repair Services

Delta Electro Power's in-shop repair services keep your electric motors, pumps, controls, air compressors and generators running, with a combination of safety, quality, service, and value you will not find anywhere else. We provide in-shop testing, repair and rewinds for small and large AC & DC electric motors and generators and repair for mechanical power components - such as gearboxes, pumps, blowers, shafts - and industrial electronics - such as Servo Motors, Spindle Motors, VFD Drives, AC & DC Drives and Servo Drives. We can also handle your authorized warranty repair and troubleshoot problems with your team.

- ◆ UL Certified industrial motor repair from fractional HP through 3500 HP/4,600 VAC kV and 500 HP DC
- ◆ Pump repairs of all makes and models, blowers, vacuum pumps, mechanical pumps, mechanical seals, mixers, and agitators
- ◆ Machine Shop Services: Welding, Fabrication, Shaft & Journal Repairs, Spray Welding, Impeller Repairs, Specialty Coatings, Sandblasting, Dynamic Balancing, and Blower Wheel Repairs
- ◆ Industrial Electronics Repair
