## Pumps

Delta Electro Power is a leading provider of sales & service for pumps in New England. Whether it's a large multistage vertical turbine pump for a municipality or a small 1hp dewatering submersible, Delta Electro Power, has the pump to fit your needs. We offer turnkey systems and bullet-proof product lines to meet any application requirements for simple, one-stop shopping. Our technicians and sales engineers average over 25 years of experience, giving you expert advice and ROI-driven solutions that are right for you, regardless of what process you are running. Double diaphragm? Centrifugal? Submersible? Delta Electro Power has you covered. We have an extensive inventory ready to deliver to your location.

Our in-field assistance will troubleshoot existing pump systems for more uptime solutions for all applications. Or, if you're ready to take a green energy approach, our team can provide expert recommendations on cleaner, energy-efficient systems and energy rebates. So whether it's a new pump system, a pump repair or just a simple wastewater application, we can help!

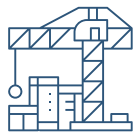

## Industries Served

**Asphalt & Aggregate**

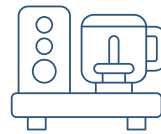

**Bio-Pharm & Pharmaceuticals**

**Construction**

**Engineering**

**Food Production & Manufacturing**

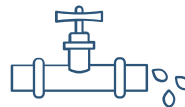

**Government & Defense**

**Hospitals**

**Schools & Universities**

**Waste & Municipal Water**

Delta looks beyond just replacing equipment. Recently we had an application that used cast iron pumps that failed regularly. Delta identified the PH level in our waste was causing the pumps to fail prematurely. Delta identified a stainless steel alternative that will save us money over the years to come.

# Pump Service Offerings

Delta Electro Power's Pump Division offers value-added solutions for product-specific repairs or full-system solutions from our factory-trained service technicians. While we work with the industry's leading brands, we are solutions-focused not brand specific, so our diagnostics and repairs will drive the best results.

Some of our offerings listed below:

- ◆ Submersibles
- ◆ End Suction Centrifugal
- ◆ Vertical Turbines
- ◆ Sewage / Wastewater Mixers
- ◆ Air Operated Double Diaphragm Pumps
- ◆ Chiller and Heating Pumps
- ◆ Vacuum Pumps
- ◆ Booster Package Overhauls
- ◆ Removal & Installations on Repair Work or Overhauls
